EDUCATION

Yeshwantrao Chavan College of Engineering (YCCE) | Nagpur, MH Bachelor of Technology in Information Technology | Expected June 2028

TECHNICAL SKILLS

- Languages: Java, JavaScript (ES6+), HTML, CSS, NOSQL
- Frameworks & Libraries: React, Node.js, Express, MongoDB, Vite, Tailwind CSS, Bootstrap.
- Developer Tools: VS Code, Git/GitHub, Vercel, Netlify, Postman, MongoDB Compass

PROJECTS

BookStore App | MERN Stack, Vite, Tailwind CSS, Vercel

- Built a full-stack bookstore where users can browse and order books Created a dynamic dashboard that separates books into free and paid categories Set up Protected Routes to ensure only logged-in users can access specific course pages Managed the database using MongoDB to store user and book information securely

Hotel Reservation System | HTML, CSS, JavaScript, EmailJS

- Developed a clean website for users to book tables at a hotel online Integrated EmailJS so the system sends a confirmation email as soon as a booking is made Designed the layout to be fully responsive so it works perfectly on mobile phones

Gatekeeper | MERN Stack, QR Code API, Tailwind CSS, JWT * Developed a secure Visitor Pass Management System (VPMS) that automates the check-in process for visitors using unique QR codes pass.

- Role-Based Access Control (RBAC) to distinguish between Admin, Security, Host and Visitor functionalities, ensuring high data security.
- Integrated real-time status tracking and a centralized dashboard for administrators to monitor entry and exit logs efficiently.
- Designed a modern, minimalist UI featuring glassmorphism effects and professional themes to enhance the user experience.

HACKATHONS & ACHIEVEMENTS

IIIT Nagpur Hackathon | National Level

- Worked in a team to build e-OPDToken, a platform for managing hospital queues
- Designed and developed the entire frontend to make it easy for patients to use

Launchpad Startup Competition | Nagpur, MH

- Pitched a business idea in a city-wide competition against participants from various colleges
- Won a prize for the idea after presenting the business model and technical plan to a panel
